*RE: GRAMA request regarding Predpol predictive policing software.*

To whom it may concern,

The Salt Lake County Sheriff's Office Jail Information Technology Unit has received no information / training/ or demonstration about the named software. The Salt Lake County Sheriff's Office is unaware of any involvement South Jordan Police may have.

We suggest contacting South Jordan Police Department 801-840-4000 as well as Unified Police Department 385-468-9755.

Sincerely,

Asst. Supervisor Bobbie Molina IB2

Salt Lake City, UT 84119

November 1, 2018

To Whom It May Concern:

Pursuant to the Government Records Access and Management Act, I hereby request
the following records:

Recent media reports suggest that the South Jordan Police Department has made
use of or will make use of Predpol predictive policing software.
(https://boingboing.net/2018/10/30/el-monte-and-tacoma.html)
Therefore, I am requesting the following records related to the above program:

* Any software and algorithms developed for the implementation of the program.
I'm particularly interested in any algorithms that have a public policy outcome,
such as providing guidance on a policy or an assessment of an individual. More
generally, I would like any software that was developed by or with, given to,
used by, purchased or licensed to this agency for implementation of the above
referenced program. This would include original source code, any compiled
binaries (also known as executables), spreadsheets, program scripts, and other
digital materials used to calculate any data in the above program. It would also
include the input training data for machine learning algorithms. Collectively,
these responsive materials will be referred to as "the software" in the
following paragraphs.

* All instructional materials, presentations and presentation materials
(including recorded video and audio, PowerPoint files, prepared remarks, and
slides formats), and other guidance on the use of "the software." This includes
any notes taking during meetings that discussed the use of the software, any
explanations (whether internally or externally generated) of how the software
works, and any other document that has been used to help explain the use of "the
software" to any party, including internal documentation, public relations
materials, and executive summaries. This also includes any description of input
and output data fields that will aid in understanding the type of information
that is submitted to the software, and that is produced by the software.

* A copy of any privacy impact assessments, use policies, standard operating
procedures, data retention policies, legal opinions, warranties, non-disclosure
agreements, contracts, liability waivers, insurance agreements, Requests for
Proposals, Responses to Requests for Proposal, Memorandums of Understanding,
Letters of Interest, usage policies, or informal agreements that reference "the
software" or otherwise guide it use or the relationship between this agency and
the provider or developer of the software.

* A copy of any funding opportunity announcements, grant applications and
grantor status/progress reports, reports to legislative bodies, annual reports
that mention the use of the Software, as well as audit records, including but
not limited to security audits of the software, misuse reports, and reports to
oversight bodies.
* A copy of any validation studies conducted with respect to the program or with
respect to any software or algorithms used in connection with the program, and a
copy of any records pertaining to inquiries for the need of validation studies,
or discussion of potential or actual validation studies. By "validation study,"
I mean any study designed to assess how accurate the program is in predicting
what it is supposed to predict, or to assess whether the program may err in the
direction of either under- or overestimating likelihoods or predicted outcomes,

or may produce any results that are biased or unexpected in any way.

* For the aspects of the software that require an input, for example, to compute a value, we request a copy of the five most recent sets of data that were used for input, as well as the five most recent outputs of the software, in whatever their native format is. If these inputs or outputs include exempt information, we ask that you exempt only that information which is specifically exempted from law, and provide the other material.

The requested documents will be made available to the general public, and this request is not being made for commercial purposes. It will be used in the course of reporting for Motherboard, VICE's science and technology website (www.motherboard.vice.com).

The requested documents will be made available to the general public, and this request is not being made for commercial purposes.

In the event that there are fees, I would be grateful if you would inform me of the total charges in advance of fulfilling my request. I would prefer the request filled electronically, by e-mail attachment if available or CD-ROM if not.

Thank you in advance for your anticipated cooperation in this matter. I look forward to receiving your response to this request within 10 business days, as the statute requires.

Sincerely,

Caroline Haskins
